Wednesday 7 June 2017 AM

REGISTRATION opens 07:30

Day 2 Plenary: Adaptation in practice 09.00-10.30, Lomond Auditorium

Break 10.30-11.00

Parallel Session 1: Parallel Session 2: Parallel Session 3: Parallel Session 4: Parallel Session 5: Parallel Session 6: Parallel Session 7: Parallel Session 8: Parallel Session 9: Parallel Session 10: Parallel Session 11:

Paradigm changes & transformation: Pathways and transformation

Economics and business: Governance

Participation and co-production: Agriculture & forestry

Communication, art and culture: Urban, energy & infrastructure

Ecosystem services and NBS: Climate services

Floating: Parallel Sessions and NBS

Participation and co-production: Governance

Lunch 12.45-13.45

1. Faraway, so close: an agent-based model to understand present-day and projected future risk to food systems and supply chains (Kindy Lewis, Met Office)

2. Using climate model output to understand future climate risks in the UK (Candida Hothaw, University of Surrey)

3. Applying the spatial extent of climate change impacts and vulnerability: Assessment of EU (1.5 degree) vs high-end RCP 8.5 scenarios for Europe (Robert Dunford, University of Oxford)

4. Characterising the demand for climate change information across a nation (Richard Tiffin, University of Reading/Agrimetrics)

5. Co-creating adaptation, mitigation and transformation pathways: a transition management application to extreme climate change scenarios (Katherina Hitches, DrR)

6. Embedding adaptation into investment decision-making (David Quency, Anglian Water)

7. Securing climate ready water supplies - the Birmingham Resilience Project (Jane Simpson, Severn Trent Water)

8. Embedding adaptation in decision-making under climate change (Irene Lewis, Met Office)

9. Future Proofing New York City’s Wastewater Infrastructure (Adam Colling, COWI)

10. To what extent can societies adapt to sea-level rise? (Daniel Unice, Global Climate Forum)

11. To what extent can societies adapt to sea-level rise? (Daniel Unice, Global Climate Forum)

12. How to combine sea-level rise impact and population activities in the Mediterranean: The Catalan coast case (Agustí Sanchez-Arcilla, Universitat Politècnica de Catalunya)

13. The role of uncertainty in evidence based climate change adaptation: The case of sea-level rise (Thorsd Thorarinsdottir, Norwegian Computing Center)

14. The role of uncertainty in evidence based climate change adaptation: The case of sea-level rise (Thorsd Thorarinsdottir, Norwegian Computing Center)

15. How to combine sea-level rise impact and population activities in the Mediterranean: The Catalan coast case (Agustí Sanchez-Arcilla, Universitat Politècnica de Catalunya)

16. Embedding adaptation in decision-making under climate change (Irene Lewis, Met Office)

17. Securing climate ready water supplies - the Birmingham Resilience Project (Jane Simpson, Severn Trent Water)

18. Embedding adaptation into investment decision-making (David Quency, Anglian Water)

19. Future Proofing New York City’s Wastewater Infrastructure (Adam Colling, COWI)

20. To what extent can societies adapt to sea-level rise? (Daniel Unice, Global Climate Forum)

21. Future Proofing New York City’s Wastewater Infrastructure (Adam Colling, COWI)

22. How to combine sea-level rise impact and population activities in the Mediterranean: The Catalan coast case (Agustí Sanchez-Arcilla, Universitat Politècnica de Catalunya)

23. The role of uncertainty in evidence based climate change adaptation: The case of sea-level rise (Thorsd Thorarinsdottir, Norwegian Computing Center)

24. The role of uncertainty in evidence based climate change adaptation: The case of sea-level rise (Thorsd Thorarinsdottir, Norwegian Computing Center)

25. How to combine sea-level rise impact and population activities in the Mediterranean: The Catalan coast case (Agustí Sanchez-Arcilla, Universitat Politècnica de Catalunya)

26. Embedding adaptation in decision-making under climate change (Irene Lewis, Met Office)

27. Securing climate ready water supplies - the Birmingham Resilience Project (Jane Simpson, Severn Trent Water)

28. Embedding adaptation into investment decision-making (David Quency, Anglian Water)

29. Future Proofing New York City’s Wastewater Infrastructure (Adam Colling, COWI)

30. To what extent can societies adapt to sea-level rise? (Daniel Unice, Global Climate Forum)

31. Future Proofing New York City’s Wastewater Infrastructure (Adam Colling, COWI)

32. How to combine sea-level rise impact and population activities in the Mediterranean: The Catalan coast case (Agustí Sanchez-Arcilla, Universitat Politècnica de Catalunya)

33. The role of uncertainty in evidence based climate change adaptation: The case of sea-level rise (Thorsd Thorarinsdottir, Norwegian Computing Center)

34. The role of uncertainty in evidence based climate change adaptation: The case of sea-level rise (Thorsd Thorarinsdottir, Norwegian Computing Center)

35. How to combine sea-level rise impact and population activities in the Mediterranean: The Catalan coast case (Agustí Sanchez-Arcilla, Universitat Politècnica de Catalunya)

36. Embedding adaptation in decision-making under climate change (Irene Lewis, Met Office)

37. Securing climate ready water supplies - the Birmingham Resilience Project (Jane Simpson, Severn Trent Water)

38. Embedding adaptation into investment decision-making (David Quency, Anglian Water)

39. Future Proofing New York City’s Wastewater Infrastructure (Adam Colling, COWI)

40. To what extent can societies adapt to sea-level rise? (Daniel Unice, Global Climate Forum)

41. Future Proofing New York City’s Wastewater Infrastructure (Adam Colling, COWI)

42. How to combine sea-level rise impact and population activities in the Mediterranean: The Catalan coast case (Agustí Sanchez-Arcilla, Universitat Politècnica de Catalunya)

43. The role of uncertainty in evidence based climate change adaptation: The case of sea-level rise (Thorsd Thorarinsdottir, Norwegian Computing Center)

44. The role of uncertainty in evidence based climate change adaptation: The case of sea-level rise (Thorsd Thorarinsdottir, Norwegian Computing Center)

45. How to combine sea-level rise impact and population activities in the Mediterranean: The Catalan coast case (Agustí Sanchez-Arcilla, Universitat Politècnica de Catalunya)

46. Embedding adaptation in decision-making under climate change (Irene Lewis, Met Office)

47. Securing climate ready water supplies - the Birmingham Resilience Project (Jane Simpson, Severn Trent Water)

48. Embedding adaptation into investment decision-making (David Quency, Anglian Water)

49. Future Proofing New York City’s Wastewater Infrastructure (Adam Colling, COWI)

50. To what extent can societies adapt to sea-level rise? (Daniel Unice, Global Climate Forum)

51. Future Proofing New York City’s Wastewater Infrastructure (Adam Colling, COWI)

52. How to combine sea-level rise impact and population activities in the Mediterranean: The Catalan coast case (Agustí Sanchez-Arcilla, Universitat Politècnica de Catalunya)

53. The role of uncertainty in evidence based climate change adaptation: The case of sea-level rise (Thorsd Thorarinsdottir, Norwegian Computing Center)

54. The role of uncertainty in evidence based climate change adaptation: The case of sea-level rise (Thorsd Thorarinsdottir, Norwegian Computing Center)

55. How to combine sea-level rise impact and population activities in the Mediterranean: The Catalan coast case (Agustí Sanchez-Arcilla, Universitat Politècnica de Catalunya)

56. Embedding adaptation in decision-making under climate change (Irene Lewis, Met Office)

57. Securing climate ready water supplies - the Birmingham Resilience Project (Jane Simpson, Severn Trent Water)

58. Embedding adaptation into investment decision-making (David Quency, Anglian Water)

59. Future Proofing New York City’s Wastewater Infrastructure (Adam Colling, COWI)

60. To what extent can societies adapt to sea-level rise? (Daniel Unice, Global Climate Forum)

61. Future Proofing New York City’s Wastewater Infrastructure (Adam Colling, COWI)

62. How to combine sea-level rise impact and population activities in the Mediterranean: The Catalan coast case (Agustí Sanchez-Arcilla, Universitat Politècnica de Catalunya)

63. The role of uncertainty in evidence based climate change adaptation: The case of sea-level rise (Thorsd Thorarinsdottir, Norwegian Computing Center)

64. The role of uncertainty in evidence based climate change adaptation: The case of sea-level rise (Thorsd Thorarinsdottir, Norwegian Computing Center)

65. How to combine sea-level rise impact and population activities in the Mediterranean: The Catalan coast case (Agustí Sanchez-Arcilla, Universitat Politècnica de Catalunya)

66. Embedding adaptation in decision-making under climate change (Irene Lewis, Met Office)

67. Securing climate ready water supplies - the Birmingham Resilience Project (Jane Simpson, Severn Trent Water)

68. Embedding adaptation into investment decision-making (David Quency, Anglian Water)

69. Future Proofing New York City’s Wastewater Infrastructure (Adam Colling, COWI)

70. To what extent can societies adapt to sea-level rise? (Daniel Unice, Global Climate Forum)

71. Future Proofing New York City’s Wastewater Infrastructure (Adam Colling, COWI)

72. How to combine sea-level rise impact and population activities in the Mediterranean: The Catalan coast case (Agustí Sanchez-Arcilla, Universitat Politècnica de Catalunya)

73. The role of uncertainty in evidence based climate change adaptation: The case of sea-level rise (Thorsd Thorarinsdottir, Norwegian Computing Center)
### 2.2 Data and information tools for adaptation planning

**Christopher Beyre, Potsdam Institute for Climate Impact Research**

**Erika Pols, Met Office and Mike Keil, Consumer Council for Water**

**Tatiana Werners, Wageningen UR & CICERO and Cosima Stahr, adelphi**

**Anke Hoff, UNRMD**

**Louise Werners, Wageningen UR**

**Simone Pedde, Stockholm Environment Institute**

**Paolo Sussassius, Institute for Environmental Studies (IVM)**

**Stephen Mac, DELFESS and Eric Haugenboem, Ministry of Infrastructure and the Environment/WWaterwaste at**

**Tanya Wilkins, ARCC Network, UKCIP and Celeste Young, Victoria Institute of Strategic Economic Studies**

**James Butler, CSIRO**

---

**1. How well can we model climate change adaptation?**

(Calum Brown, University of Edinburgh)

**2. Climate resilient infrastructure: Getting policies right**

(Michael Mullon, OECD)

**3. Introduction: Perspective on climate services for business - a network of actors**

(Karine de Brun, Wageningen UR & Ass St. Clair)

**4. Barrier or Opportunity? Strategic reframing of the Fragmented Linkage between Migration and Climate Change Adaptation**

(Ullyana Selena Lee, London School of Economics)

**5. Increasing Resilience in Scotland’s Forest Sector: Demonstrating Adaptation**

(Emily Hines, ECI, University of Oxford)

**6. Building capacity through the simultaneous creation of Regional Strategic Adaptation for Climate Change in Portugal – ClimAdapt/Porto Local project**

(Filipe Duarte Santos, ECI, University of Lisbon)

---

**7. Adaptation by the least vulnerable - Managing climate risks in a Nordic welfare state**

(Karinilla Piir, Finnish Meteorological Institute)

**8. Adoption strategies to address climate change impacts on coastal Maori communities in Aotearoa New Zealand: integrating a geomorphological perspective**

(Jane Richardson, Massey University)

**9. Revealing the Economy, Whole Effects of the Climate Change Adaptation - A Macroeconomic Assessment of Adaptation Funding for the Case of Austria (Robert Bachner, University of Graz)**

**10. Tackling the implementation challenge of nature-based flood defences solutions**

(Stephanie Jansen, Deft University of Technology)

---

**12. Lessons from the trenches in a polarised conversation - talking action place look like?**

(Anne Marte Bergersen and Joe Hagg)

**13. Livelihood adaptation pathways: using scenarios to design climate compatible development in Indonesia and Papua New Guinea**

(James Butler, CSIRO)

---

**14. From global climate science to local resilience strategy: identifying evidence-based interventions to address climate risks**

(Andy Mac, AcaP)

**15. Sharing lessons and enabling action - identifying how to move from understanding your climate risk to embedding it in decision making**

(Amanda Croxall, Wageningen UR and Lisa Constable, Network Rail)

**16. Assessing the relevance of group size for community-based climate adaptation insights from Rwanda**

(Christian Kind, adelphi)

**17. Business strategies and communication: urban and peri-urban commodities and services in West Africa, Latin America and Asia**

(Peer Seipold)

**18. Does size matter? An assessment of scale and governance issues for the Fragile States**

(Andrea Stien, Ecologic Institute)

**19. Accounting for Adaptation Challenges in a Globalized World: Using Input-Output Data to Quantify Transnational Climate Impacts (Elle Olson, Stockholm Environment Institute)**

**20. Added value of ecosystem services for the Delta Programme (Ron Franken, PBL Netherlands)**

---

**21. Case 3: Monitoring the performance of adaptation action (Stephenie Hj, Deft)**

**22. Effective communication and engagement to motivate adaptation action – learning from the built environment and infrastructure sectors. A network approach**

(Tanya Wilkins, ARCC Network, UKCIP)

**23. Three Horizons pathways approach: Shaping emerging storylines in community resilience**

(Ben Fahey, University of Dundee)

---

**24. How resilient are forest management plans under climate and societal change?**

(Michal Petr, Forest Research)

**25. Case of Ghana**

(Saskia Werners, Wageningen UR & CICERO and Cosima Stahr, adelphi)

**26. Water, Identity and Nationalism in Great Britain**

(Emily Hines, ECI, University of Oxford)

**27. Assessing regional vulnerability and building adaptive capacity in Austra**

(Louise Bosonnet, University of Technology, Sydney)

**28. Shifting whales and changing climates - emerging challenges for the whole watch industry (Jan Olaf Meynjes, Griffith Centre For Coastal Management)**

**29. Interactive discussion: Sharing experiences (Karin de Bruin, adelphi)**

---

**30. 6. Bell Water: science and society co-producing adaptation plans at river basin scale (Annelies Meynecke, CREAW)**

---

**Wednesday 7 June 2017 PM 13.45-15.30**

**Break 15.30-16.00**
